

Clinical Research

Our physicians place a high priority on our commitment to the advancement of medical research. Southeastern Retina participates in multiple clinical trials that are investigating new forms of treatment for macular degeneration, diabetic retinopathy, and a variety of other retinal conditions.

More information on clinical trials is available at southeasternretina.com

To ask about trials currently enrolling and the requirements to take part, patients or referring physicians may call SERA's Clinical Trials Coordinator in Knoxville at **865-588-0811**.

- Cystoid macular edema
- Degenerative myopia
- Diabetic retinopathy
- Inherited retinal disorders
- Lattice degeneration
- Macular holes
- Macular pucker
- Pediatric and neonatal retinal disorders
- Penetrating ocular trauma
- Retinal tears / detachment
- Uveitis

When You Come to Our Office

Our fully equipped, conveniently located offices are open 8am to 5pm, with patient care available 24/7/365 if necessary. We make every effort to see you in the office of your choice, but in emergency situations you may be seen at a different location.

Your first visit:

Includes a thorough examination of your eyes and questions about your general health—it may take up to three hours. We will dilate your eyes to allow close examination of the retina; please arrange for a ride home after the dilation.

Open communication:

Your diagnosis will be fully explained to you and your family. If lab tests are required we will call with the results. We will explain the plan for treatment and keep your referring physician fully informed about your progress. Please call the office if you have any questions at any time.

Surgery and hospitalization:

Your doctor may choose to perform surgery in the office or at a surgery center or hospital. If you require surgery or hospitalization, you will be told exactly what to expect. The most common surgeries are vitrectomy, macular hole surgery, diabetic retinopathy surgery, laser retinal surgery and scleral buckling.
