

SOUTHEASTERN RETINA ASSOCIATES

PLEASE COMPLETE ALL THE ENCLOSED INFORMATION BEFORE ARRIVING FOR YOUR APPOINTMENT.

NOTE THAT YOU MAY BE DILATED AT EVERY VISIT, THEREFORE IT IS ALWAYS RECOMMENDED THAT YOU BRING A DRIVER.

Dear Patient:

We would like to welcome you to Southeastern Retina Associates. Please visit our website (www.southeasternretina.com) for more information about our practice, physicians, and various locations in Tennessee, and the surrounding states.

Thorough retinal evaluation requires that you spend more time in our office than would be necessary for a general eye examination. During the initial visit, we will ask you questions about your eyes, your general health, and any medications that you take. Collection of medical information and a variety of tests must be performed both before and after dilation of the pupils. Please bring a companion to drive you home after the dilated eye exam.

Please remember that traffic and parking can add to delays at some of the different locations, so consider allowing for additional travel time. If you discover that you are going to be late, please call us as soon as possible. We do understand unforeseeable delays may occur. We will try to accommodate the patients who are late, but please understand this may not always be possible without compromising the quality of your care and depriving other patients of their own scheduled appointment times.

Thank you,
Southeastern Retina Associates

INFORMATION REGARDING DILATING EYE DROPS

Dilating drops are used to dilate or enlarge the pupils of the eye to allow your doctor to get a better view of the inside of your eye.

Dilating drops frequently blur vision for a length of time which varies from person to person and may make bright lights bothersome. It is not possible for your ophthalmologist to predict how much your vision will be affected. Because driving may be difficult immediately after an examination, it's best if you make arrangements not to drive yourself. Depending on your condition, your doctor may dilate one or both eyes. However, your doctor will typically dilate both eyes and you should therefore anticipate that both of your eyes will be dilated at every visit.

Adverse reactions, such as acute angle-closure glaucoma, may be triggered from the dilating drops. This is extremely rare and treatable with immediate medical attention.

I hereby authorize my physician with Southeastern Retina Associates and/or such Southeastern Retina Associates' assistants as may be designated by him/her to administer dilating eye drops.
